MARKET REVIEW

In 2021, the global economic recovery continued as economic performance accelerated amid the lifting of most Pandemic restrictions and deployment of COVID-19 vaccines. According to the International Monetary Fund (IMF), global growth reached 5.9% during the year. Benefited from the effective anti-pandemic measures and a series of economic support and stimulus policies implemented by the Chinese Government, China sustained steady recovery of the national economy and maintained the leading position in economic growth and pandemic prevention and control in the world. China's economy showed a strong rebound in 2021. GDP expanded 8.1%, beating the government's own target of "expected above 6%", despite the complex international environment, resurgent COVID-19 cases, and severe flooding in Henan province. Consumption remained as one of the key drivers for China's economic growth. Retail sales grew by 12.5%, in which retail sales of automobiles exceeded RMB4 trillion to RMB4.4 trillion, up 7.6% year-on-year, according to the China Association of Automobile Manufacturers (CAAM).

Meanwhile, China's exhibition industry saw rapid expansion in 2021 against the backdrop of severe challenges brought by the Pandemic to offline exhibitions across the world. As a result of the swift economic recovery and effective control of the virus within the border, China has emerged as a haven for global businesses.

During the first three quarters of 2022, China's economic development was extremely unusual. Major economic indicators plunged in April. China's government rolled out a package of pro-stability policy measures on maintaining stable macroeconomic performance and the economy. The decline of major economic indicators narrowed in May, and in June registered a stable recovery. The economy in the third quarter showed sound momentum with the GDP up by 3.9% year on year. Even though the Pandemic is still spreading globally and the international landscape is complicated with high uncertainties and instabilities, the foundation for economic recovery and development will be consolidated, and the economy running will be kept within an appropriate range to achieve the best results for the full year of 2022.

The decrease was primarily due to the exhibition industry started to recover for the nine months ended 30 September 2021 but was adversely impacted by the Pandemic from March to May 2022. It resulted in the suspension of exhibition events and decrease of revenue achieved by the Group during the Period.

During the Period, revenue from automobile related exhibitions and events related services increased from approximately RMB50.26 million for the nine months ended 30 September 2021 to approximately RMB54.46 million for the Period, representing a slight period-on-period increase of approximately 8.37% or approximately RMB4.20 million and accounting for 54.02% of the total revenue for the Period.

For the Period, the Group recorded a gross profit approximately RMB4.34 million, representing a period-on-period decrease of approximately RMB9.21 million as compared with approximately RMB13.55 million for the nine months ended 30 September 2021. The decrease in gross profit was mainly due to the decline of sales revenue resulted by the severe adverse impacts on exhibition and event management services industry caused by the outbreak of Pandemic in the PRC in the second quarter of 2022 and the growth of the Group's costs for the Period.

For the Period, the Group's gross profit margin was approximately 4.30%. PRINCIPAL RISKS AND UNCERTAINTIES

The Group faces the following principal risks and uncertainties that may materially and adversely affect its business, financial status and operating results:

- 1. The exhibition services industry in the PRC has relatively low entry barriers and competition is keen within the industry.
- 2. The Group's business depends heavily on the provision of exhibition and event management services in the automobile industry.
- 3. The majority of the Group's customers are automobile companies and there is no assurance that it can successfully diversify its customer base.
- 4. There is no assurance that the demand for integrated exhibition and event management services the Group provides can continue or increase.
- 5. There may be fluctuations in the Group's cost of service which it may not be able to pass on to customers.
- 6. The Group may face cash flow problems if it is unable to receive payments from customers on time and in full under the current pricing policy.
- 7. The Group may be exposed to litigation risk as a result of the engagement of suppliers without obtaining written consent from customers.
- 8. The Group relies on suppliers for the provision of construction services, leasing of equipment and logistics and transportation services, hence may have to bear the consequences should these suppliers deliver substandard services on its own capacity.

- 9. The Group relies on its senior management and other key personnel and may not be able to retain these staff to provide services.
- 10. The Group may not be able to implement its business strategies and its future growth could be limited.
- 11. The control and prevention of the Pandemic around the world are still challenging and risky and may continue to influence on the recovery of exhibition industry in PRC to normal, which may in turn have a material and adverse effect on the Group's business, financial position and results of operations.

The cost of exhibition and event related services provided by suppliers makes up a significant portion of the Group's cost of service. The following uncertainties may affect the Group's efforts to implement cost control measures:

As human resources and costs of construction materials and equipments are the major components of the
cost of exhibition and event related services, increase in salary of employees of suppliers and average
consumer prices may push up the lump sum cost of exhibition and event related services provided by
suppliers.

Major risks and uncertainties relating to the implementation of business strategies

- 1. The Group expects to tender proposals to potential new customers with lower profit margins in the short run in connection with its future expansion to new segments in the market and such expansion could exert great pressure on allocation of resources.
- The Group cannot guarantee that it will have sufficient resources to support future development. Its future
 growth is also subject to the preferences of potential clients and the overall market situation. Failure to
 execute expansion strategy effectively may lead to higher costs, inefficient operation flow and decline in
 profitability.

FUTURE PLANS FOR MATERIAL INVESTMENTS, ACQUISITIONS AND CAPITAL ASSETS

The Group did not have other plans for material investments, acquisitions and capital assets during the Period.

MATERIAL ACQUISITIONS AND DISPOSALS RELATED TO THE SUBSIDIARIES AND ASSOCIATED COMPANIES

During the Period, the Group did not have any material acquisitions and disposals related to the subsidiaries and associated companies.

CONTINGENT LIABILITIES

HUMAN RESOURCES

As at 30 September 2022, the Group employed a total of 55 employees, among which 9 of them were at management level, all stationed in the PRC. For the Period, the staff costs (including Directors' emoluments) were approximately RMB9.52 million (for the nine months ended 30 September 2021: approximately RMB8.82 million). The Group conducts periodic performance review with employees and determines their salaries, benefits and discretionary bonuses based on factors including qualifications, contributions, years of experience and performance.

In accordance with the applicable PRC laws and regulations, the Group has made contributions to social security insurance and housing provident funds for all eligible staff. For the Period, the total amount contributed in these areas by the Group was approximately RMB2.54 million. The Group has complied with all the requirements about social security insurance and housing provident fund obligations applicable under the PRC laws and regulations.

In order to continually maintain the quality, knowledge and skills of employees, the Group has provided various training opportunities, which include on-the-job training, technical training and professional training.

The Group has maintained a good working relationship with its employees. During the Period, the Group has not experienced any significant labor disputes which are likely to have an adverse material impact on business, financial conditions and results of operations.

The Company's policies concerning emoluments of Directors are (i) the amount of emoluments is determined on the basis of the relevant Director's experience, responsibility, workload and the time devoted to the Company; and (ii) non-cash benefits may be provided to the Directors under their remuneration package.

FOREIGN EXCHANGE RISK

The Group is not exposed to any significant foreign exchange risk in the normal course of business, as it operates in the PRC with the majority of the transactions being conducted and settled in RMB.

CREDIT RISK

Credit risk exposures arise principally in cash and cash equivalents, trade and other receivables, notes receivables and contract assets shown on consolidated balance sheets.

The Group takes on exposure to credit risk, which is the risk that a customer or counterparty will cause a financial loss for the Group by failing to discharge an obligation. Credit risk is one of the most significant risks for the Group's business.

For cash at bank the Group manages the credit risk by placing its domestic deposits in reputable nationwide financial institutions with good credit ratings in the PRC and overseas' deposits in reputable international financial institutions. The Group believes those banks and financial institutions are of high-credit-quality without significant credit risk. Thus it considers its cash at bank are not at high credit risk.

The Group's trade receivables arise from exhibition and event marketing services fees, over 70% of which are in turn derived from main customers that are renowned automobile companies. Should there be change in the strategic relationships with these main customers that might cause change in the cooperative arrangements; or if they experience financial difficulties themselves which in turn causes difficulties in their settling payables to the Group, the Group's revenue from those automobile companies might be adversely affected due to deterioration in recoverability of trade receivables from them.

To manage this risk, the Group's management team maintains frequent communications with their contacts at those automobile companies to ensure the Group captures the most updated understanding about relevant customer's business status and assesses their credibility. In view of the smooth cooperation history with these automobile companies and the sound collection history of receivables due from them, management believes that the credit risk inherent in the Group's outstanding trade receivable balances due from those automobile companies is low. As for new customers, the management is responsible for managing and analysing the credit risk for each of them before such new customers will be offered standard payment and delivery terms and conditions. To perform such assessment, various factors including their financial position and other factors about these new customers would be considered.

The Group's other receivables comprise of deposits, staff advance and loans to employees, which have a low risk of default, thus the Group considers its other receivables are not at high credit risk.

The notes receivables are bank acceptance bills which have a low risk of default; thus the Group considers its notes receivables are not at high credit risk.

LIQUIDITY RISK

The Group regularly monitors current and expected liquidity demand to ensure that it maintains sufficient cash reserves to meet related demand in the short and long run. The Group monitors liquidity position through rolling forecasts of liquidity requirements in order to ensure that it has sufficient cash on hand to satisfy operational needs.

PROSPECTS

In the first three quarters of 2022, China's government applied a series of policies and the follow-up measures based on the requirements of ensuring effective COVID-19 containment, economic stability and development security to achieve notable results. The national economy has overcome the adverse impact of unexpected factors, demonstrating the momentum of a stable recovery in the third quarter, notably better than the second quarter. The services industry was impacted adversely by the Pandemic in the second quarter grew with the value added up by 2.3% year on year, and 0.5 percentage points ahead than that in the first half of the year 2022.

It should be aware that with the external environment becoming increasingly complicated and severe, the foundation for domestic economic recovery is still not solid. At the next stage, China's government will continue to ensure stability on six key fronts (employment, the financial sector, foreign trade, foreign investment, domestic investment, and expectations) and security in six key areas (job security, basic living needs, operations of market entities, food and energy security, stable industrial and supply chains, and the normal functioning of primary level governments). The implementation of relevant policies will be enhanced and the policy effectiveness will be further unleashed to shore up the market entities, stabilise employment and prices, expand effective demand, promote reform and stimulate vitality, so as to consolidate the foundation for economic recovery and development, keep the economy running within an appropriate range and endeavor to achieve the best results.

Looking forward, the Group will effectively improve the level of co-ordination and management of exhibitions and events through the implementation of the above business strategies, improve customer service and experience in an all-round way, actively seek reformation with a view to continuing to create sustainable returns for shareholders.
